

AMENDMENTS TO THE CLAIMS

1. (Original): A cosmetic composition comprising from 2% to 50% of at least one silicone gum, from 10% to 90% of at least one silicone oil, from 0.5% to 15% of at least one pigment, and from 0 to 30% of at least one filler, wherein said at least one silicone gum is of the formula:

in which R1, R2, R5 and R6 each independently represents an alkyl radical having from 1 to 6 carbon atoms;

R3 and R4 each independently represents an alkyl radical having from 1 to 6 carbon atoms or an aryl radical;

X represents an alkyl radical having from 1 to 6 carbon atoms, a hydroxyl radical or a vinyl radical; and

n and p are selected so as to give said silicone gum a viscosity of greater than 100,000 mPa s, and

wherein said composition is anhydrous and water-resistant, and further wherein said composition has cosmetic properties.

2. (Original): A composition according to claim 1, wherein said at least one silicone gum is present in an amount which ranges from 4% to 15% by weight relative to the total weight of said composition.

3. (Original): A composition according to claim 2, wherein said at least one silicone gum is present in an amount which ranges from 6% to 9%, by weight relative to the total weight of said composition.

4. (Original): A composition according to claim 1, wherein n and p have values ranging from 0 to 5000.

5. (Original): A composition according to claim 4, wherein n and p have values ranging from 0 to 3000.

6. (Original): A composition according to claim 1, wherein said at least one silicone gum is a gum wherein:

the substituents R1 to R6 and X represent a methyl group, $p=0$ and $n=2700$;

the substituents R1 to R6 and X represent a methyl group, $p=0$ and $n=2300$;

the substituents R1 to R6 represent a methyl group, the substituent X represents a hydroxyl group, $p=0$ and $n=2700$; or

the substituents R1, R2, R5, R6 and X represent a methyl group, and the substituents R3 and R4 represent an aryl group, and p and n are selected such that the molecular weight of the compound is approximately 600,000.

7. (Original): A composition according to claim 1, wherein said at least one silicone oil is present in an amount which ranges from 30% to 70%.

8. (Original): A composition according to claim 1, wherein said at least silicone oil is a cyclomethicone, a polydimethylsiloxane of viscosity less than 100 mPa s, or an alkyldimethicone.

9. (Original): A composition according to claim 1, wherein said at least one pigment is present in an amount which ranges from 2 to 8% by weight relative to the total weight of the composition.

10. (Original): A composition according to claim 1, wherein said at least one pigment is inorganic or organic and is coated or non-coated.

11. (Original): A composition according to claim 1, wherein said at least one pigment is titanium dioxide, zinc oxide, zirconium dioxide, black, yellow, red or brown iron

oxide, cerium dioxide, an organic pigment or a mixture thereof.

12. (Original): A composition according to claim 11, wherein said organic pigment is barium, strontium, calcium or aluminium lakes.

13. (Original): A composition according to claim 1, which is in the form of a make-up product or a hair product.

14. (Original): A composition according to claim 13, wherein said make-up product is a lipstick, a blusher, an eyeshadow or a foundation and said hair product is a styling make-up gel.

15. (Original): A composition according to claim 1, wherein said at least one silicone gum and said at least one silicone oil are present in the form of a homogenous premix consisting of said at least one silicone gum solubilized in said at least one silicone oil.

16. (Original): A composition according to claim 1, wherein said at least one filler is inorganic or synthetic and lamellar or non-lamellar.

17. (Original): A composition according to claim 1, which further comprises at least one gelling agent, vitamin, sunscreen or oil material.

18. (Previously Presented): A cosmetic composition comprising from 2% to 50% of at least one silicone gum, from 10% to 90% of at least one volatile oil, from 0.5% to 15% of at least one pigment, and from 0 to 30% of at least one filler, wherein said at least one silicone gum is of the formula:

in which

RI, R2, R5 and R6 each independently represents an alkyl radical having from 1 to 6 carbon atoms:

R3 and R4 each independently represents an alkyl radical having from 1 to 6 carbon atoms or an aryl radical;

X represents an alkyl radical having from 1 to 6 carbon atoms, a hydroxyl radical or a vinyl radical; an

n and p are selected so as to give said silicone gum a viscosity of greater than 100,000 mPa·s, and

wherein said composition is anhydrous and water-resistant; and further wherein said composition has cosmetic properties.

19. (Previously Presented): A composition according to claim 18, wherein said at least one silicone gum is present in an amount which ranges from 4% to 15% by weight relative to the total weight of said composition.

20. (Previously Presented): A composition according to claim 19, wherein said at least one silicone gum is present in an amount which ranges from 6% to 9% by weight relative to the total weight of said composition.

21. (Previously Presented): A composition according to claim 18, wherein n and p have values ranging from 0 to 5000.

22. (Previously Presented): A composition according to claim 21, wherein n and p have values ranging from 0 to 3000.

23. (Previously Presented): A composition according to claim 18, wherein said at least one silicone gum is a gum wherein (a) R1 to R6 and X are methyl, and p=0, or (b) R1 to R6 and X are methyl, and n=0.

24. (Previously Presented): A composition according to claim 18, wherein said volatile oil is present in an amount of 30% to 70%.

25. (Previously Presented): A composition according to claim 18, wherein said volatile oil is a cyclomethicone.

26. (Previously Presented): A composition according to claim 18; wherein said at least one pigment is present in an amount of 2 to 8% by weight relative to the total weight of the composition.

27. (Previously Presented): A composition according to claim 18, wherein said at least one pigment is non-coated.

28. (Previously Presented): A composition according to claim 18, wherein said at least one pigment is titanium dioxide, zinc oxide, zirconium dioxide, black, yellow, red or brown iron oxide, cerium dioxide, an organic pigment or a mixture thereof.

29. (Previously Presented): A composition according to claim 28, wherein said organic pigment is barium; strontium, calcium or aluminum lakes.

30. (Previously Presented): A composition according to claim 18; which is in the form of a make-up product or a hair product.

31. (Previously Presented): A composition according to claim 30, wherein said make-up product is a lipstick a blusher, an eyeshadow or a foundation and said hair product is a styling make-up gel.

32. (Previously Presented): A composition according to claim 18 for application to the lips.

33. (Canceled).

34. (Previously Presented): A composition according to claim 18, wherein said at least one filler is mica.

35. (Previously Presented): A composition according to claim 18, which further comprises at least one gelling agent, vitamin, or sun-screen material, or a plant oil, a synthetic ester, lecithin, a fragrance, or an essential oil.

36. (Previously Presented): A composition according to claim 18, comprising a gelling agent.

37. (Previously Presented): A composition according to claim 18, comprising a modified clay.

38. (Previously Presented): A cosmetic composition comprising from 2% to 50% of at least one silicone gum, from 10% to 90% of at least one volatile component, from 0.5% to 15% of at least one pigment, and from 0 to 30% of at least one silicone-containing resin, wherein said at least one silicone gum is of the formula:

in which

R1, R2, R5 and R6 each independently represents an alkyl radical having from 1 to 6 carbon atoms;

R3 and R4 each independently represents an alkyl radical having from 1 to 6 carbon atoms or an aryl radical;

X represents an alkyl radical having from 1 to 6 carbon atoms, a hydroxyl radical or a vinyl radical; and

n and p are selected so as to give said silicone gum a viscosity of greater than 100,000 mPa's, and

wherein said composition is anhydrous and water-resistant, and further wherein said composition has cosmetic properties.

39. (Previously Presented): A composition according to claim 38, wherein said at least one silicone gum is present in an amount which ranges from 4% to 15% by weight relative to the total weight of said composition.

40. (Previously Presented): A composition according to claim 39, wherein said at least one silicone gum is present in an amount which ranges from 6% to 9% by weight relative to the total weight of said composition.

41. (Previously Presented): A composition according to claim 38, wherein n and p have values ranging from 0 to 5000.

42. (Previously Presented): A composition according to claim 41; wherein n and p have values ranging from 0 to 3000.

43. (Previously Presented): A composition according to claim 38, wherein said at least one silicone gum is a gum wherein (a) R1 to R6 and X are methyl, and p=0, or (b) R1 to R6 and X are methyl, and n=0.

44. (Previously Presented): A composition according to claim 38, wherein said volatile component is present in an amount of 30% to 70%.

45. (Previously Presented): A composition according to claim 38, wherein said volatile component is a cyclomethicone.

46. (Previously Presented): A composition according to claim 38, wherein said at least one pigment is present in an amount of 2 to 8% by weight relative to the total weight of the composition.

47. (Previously Presented): A composition according to claim 38, wherein said at least one pigment is noncoated.

48. (Previously Presented): A composition according to claim 38, wherein said at least one pigment is titanium dioxide, zinc oxide, zirconium dioxide, black, yellow, red or brown iron oxide, cerium dioxide, an organic pigment or a mixture thereof.

49. (Previously Presented): A composition according to claim 48, wherein said organic pigment is barium, strontium, calcium or aluminum lakes.

50. (Previously Presented): A composition according to claim 38, which is in the form of a make-up product or a hair product.

51. (Previously Presented): A composition according to claim 50, wherein said make-up product is a lipstick, a blusher, an eyeshadow or a foundation and said hair product is a styling make-up gel.

52. (Previously Presented): A composition according to claim 38 for application to the lips.

53. (Previously Presented): A composition according to claim 38, wherein said at least one filler is mica.

54. (Previously Presented): A composition according to claim 38, which further comprises at least one gelling agent, vitamin, or sun-screen material, or a plant oil, a synthetic ester, lecithin, a fragrance, or an essential oil.

55. (Previously Presented): A composition according to claim 38, comprising a gelling agent.

56. (Currently Amended): A composition according to claim 38, comprising a modified ~~agent~~ clay.

57. (New): A composition according to claim 18, wherein said at least one silicone gum is a gum wherein R1 to R6 and X are methyl, and p=0.

58. (New): A composition according to claim 38, wherein said at least one silicone gum is a gum wherein R1 to R6 and X are methyl, and p=0.

59. (New): A cosmetic composition comprising from 2% to 50% of at least one silicone gum, at least one silicone-containing component, from 0.5% to 15% of at least one pigment, and from 0 to 30% of at least one filler, wherein said at least one silicone gum is of the formula:

in which

R1, R2, R5 and R6 each independently represents an alkyl radical having from 1 to 6 carbon atoms;

R3 and R4 each independently represents an alkyl radical having from 1 to 6 carbon atoms or an aryl radical;

X represents an alkyl radical having from 1 to 6 carbon atoms, a hydroxyl radical or a vinyl radical; and

n and p are selected so as to give said silicone gum a viscosity of greater than 100,000 mPa·s, and

wherein said composition is anhydrous and water-resistant, and further wherein said composition has cosmetic properties.

60. (New): A composition according to claim 59, wherein said at least one silicone gum is present in an amount which ranges from 4% to 15% by weight relative to the total weight of said composition.

62. (New): A composition according to claim 59, wherein n and p have values ranging from 0 to 5000.

63. (New): A composition according to claim 62; wherein n and p have values ranging from 0 to 3000.

64. (New): A composition according to claim 59, wherein said at least one silicone gum is a gum wherein (a) R1 to R6 and X are methyl, and p=0, or (b) R1 to R6 and X are methyl, and n=0.

65. (New): A composition according to claim 59, wherein said at least one pigment is present in an amount of 2 to 8% by weight relative to the total weight of the composition.

66. (New): A composition according to claim 59, wherein said at least one pigment is noncoated.

67. (New): A composition according to claim 59, wherein said at least one pigment is titanium dioxide, zinc oxide, zirconium dioxide, black, yellow, red or brown iron oxide, cerium dioxide, an organic pigment or a mixture thereof.

68. (New): A composition according to claim 67, wherein said organic pigment is barium, strontium, calcium or aluminum lakes.

69. (New): A composition according to claim 59, which is in the form of a make-up product or a hair product.

70. (New): A composition according to claim 69, wherein said make-up product is a lipstick, a blusher, an eyeshadow or a foundation and said hair product is a styling make-up gel.

71. (New): A composition according to claim 59 for application to the lips.

72. (New): A composition according to claim 59, wherein said at least one filler is mica.

73. (New): A composition according to claim 59, which further comprises at least one gelling agent, vitamin, or sun-screen material, or a plant oil, a synthetic ester, lecithin, a fragrance, or an essential oil.

74. (New): A composition according to claim 59, comprising a gelling agent.

75. (New): A composition according to claim 59, comprising a modified clay.

76. (New): A composition according to claim 59, wherein said at least one silicone gum is a gum wherein R1 to R6 and X are methyl, and p=0.

77. (New): A composition according to claim 59, wherein said at least one silicone gum is a gum wherein (a) R1 to R6 and X are methyl.

78. (New): A cosmetic composition comprising from 2% to 50% of at least one silicone gum, at least one silicone-containing component, from 0.5% to 15% of at least one pigment, from 0 to 30% of at least one filler, and at least one gelling agent, wherein said at least one silicone gum is of the formula:

in which

R1, R2, R5 and R6 each independently represents an alkyl radical having from 1 to 6 carbon atoms;

R3 and R4 each independently represents an alkyl radical having from 1 to 6 carbon atoms or an aryl radical;

X represents an alkyl radical having from 1 to 6 carbon atoms, a hydroxyl radical or a vinyl radical; and

n and p are selected so as to give said silicone gum a viscosity of greater than 100,000 mPa·s, and

wherein said composition is anhydrous and water-resistant, and further wherein said composition has cosmetic properties.
